

Project Design Phase-I Solution Architecture

Date	3 November 2023
Team ID	NM2023TMID09736
Project Name	How to create a reel using Canva

Solution Architecture:

Creating a solution architecture block diagram involves visually representing the components and interactions of a system or solution.

At the top of your diagram, include a title and a brief description to explain the purpose of the architecture.

Show any external interfaces that the solution interacts with, such as users, third-party services, or external systems. These are typically depicted as labeled arrows entering and exiting the diagram.

Example - Solution Architecture Diagram:
